J. Metered rates

Single-family residences	
Minimum monthly charge for which up to 1,000 gallons may be used	\$21.50
Use of over 1,000 gallons	\$2.50 per thousand gallons
Multiple family units	
Separate meters	same as Single-family rates

Master metered - calculated by dividing the total water usage by the total number of dwelling units and applying the rates established for single-family residences. The monthly water usage charge for such multiple-dwelling unit complex shall be determined by multiplying the charge per dwelling unit by the total number of dwelling units. The number of dwelling units for mobile home and travel trailer parks shall be determined by calculating the number of available spaces.

Commercial/industrial users. The minimum monthly charge for commercial/industrial users for up to two thousand (2,000) gallons of water shall be based on meter size, as described below. All water used over two thousand (2,000) gallons will be...

\$2.65 per thousand gallons

Meter Size	Minimum Charge per Unit
¾ inch	\$10.28
1 inch	\$30.85
2 inch	\$51.41
3 inch	\$71.97
4 inch	\$113.10
6 inch	\$154.23

Combination residential and commercial/industrial users. Combination residential and commercial/industrial users whose primary activity is not commercial/industrial related will be classified as multiple-dwelling units and will be charged using the multiple-dwelling unit formula at one hundred (100) percent of the minimum single-family residence monthly usage and rate. Combination residential and commercial/industrial users whose primary activity is commercial/industrial in nature shall be charged the appropriate commercial/industrial rates.

K. Turning on water

Administration fee	\$15.00
